

*The 6<sup>th</sup> Course on  
“Managing Patients with  
Implantable Cardioverter Defibrillators”  
27<sup>th</sup> – 28<sup>th</sup> January 2010*

*Organisers:*

*Professor R. Schilling, Dr. S. Sporton and Eleanor McFarlane*

The Course on "Managing Patients with ICDs" is a two day course providing participants with a working knowledge of Implantable Cardioverter Defibrillators and the safe management of this patient group.

Registration is limited allowing a high ratio of lecturers to delegates.

The aim is to answer the following questions for practitioners with little or no experience of these devices:

- Who should have a defibrillator?
- What do defibrillators do and how do they work?
- What problems can occur?
- How do I look after a defibrillator patient?

Details of the course and registration forms may be obtained from:
